Eltel signs contract worth about EUR 15 million to build transmission line in Finland

Eltel Finland has signed an agreement with VALOREM, a green energy operator, to build a 110 kV transmission line for a wind farm in Western Finland. The contract is worth about EUR 15 million.

Eltel's scope of works covers a turnkey delivery of a 40 km 110 kV transmission line, to connect the Kalistanneva and Matkussaari wind farms to the national grid. To increase transmission capacity, the line is constructed as a double circuit line, where both power lines run in the same tower structure.

The project will start immediately and is scheduled to be completed by the end of Q1 2024.
