Eltel wins new major framework contract for construction, worth up to EUR 83 million

Eltel and the Swedish Transport Administration have signed another major new framework agreement, this time for the construction of the Swedish Transport Administration's nationwide communications network. The undertaking applies to installation work all over Sweden.

The maximum contract period is seven years, including four option years, with a value of up to EUR 83 million (SEK 950 million), where the initial three-year period is estimated at EUR 35 (SEK 400 million). The agreement will enter into force on 1 December 2025.

The agreement covers installation work in the Swedish Transport Administration's nationwide telecom infrastructure for a number of technical areas in fixed and mobile communications.
