Eltel wins new framework agreement, worth up to EUR 82 million

The Swedish Transport Administration has carried out a procurement of a new contract period for maintenance and fault rectification for the Swedish Transport Administration's nationwide communication network. Eltel has once again exclusively won this contract area, covering round-the-clock service for copper and fiber networks across the country.

The maximum contract period is seven years, including four option years. The total value amounts to EUR 82 million, of which the value for the initial three-year period is estimated at EUR 35 million. The agreement will enter into force on 1 December 2025.
