## **Eltel improves the network capacity on the Öresund Bridge**

**Eltel and Öresundsbro Konsortiet have signed a frame agreement for the upgrade of the Öresund Bridge's fiber network. The agreement is estimated to be worth approximately SEK 30 million.**

Eltel's assignment involves upgrading the fiber infrastructure on the entire connection, thereby increasing the capacity of the network.

Eltel has previously worked on the bridge in connection with the construction of an antenna system that reinforces and complements the base stations on each coastal stretch and extends across the entire connection.

“We are of course very proud to be entrusted with working on the Öresund Bridge again, and thereby once again demonstrate that we have the ability to meet the demands of customers with operations critical to society, says Lars Nilsson, Managing Director of Eltel Sweden.
